

10 Minute Explanation On How Economies Work by [Norb Svanascini](#)

As a young man who loved flying both model and real airplanes, and having to learn the forces that act upon a plane in flight, while at the same time always being enamored with the economy and how it worked, it came to me that the similarities were obvious, and if we replace "Gravity" with acts of God (things you cannot control, i.e. weather, death, sickness) "Drag" (things we can control but impose on the economy, i.e. politics), "Thrust" with Business and Industry, "Lift" with the corresponding result of these forces; the obvious parallel is self explanatory
